|  | Proposed Temporary 1.8m High Paladin Fence - Green Finish |
|  | Proposed 675mm High Brick Wall with 1.2m Flat-Top Railing Above |
|  | Existing Blockwork Boundary to be Retained |

Planning standards

Landscape Design completed with reference to the following guidance and standards:

- Guidance of the Centre for Excellence in Universal Design with regard to universal access requirements.
- Building Regulations, part M.
- Urban Design Manual - A Best Practice Guide, Department of Environment Health and Local Government publication
- Retail Design Manual, Department of Arts Heritage and the Gaeltacht publication
- Buildings for everyone-A Universal Design Approach, National Disability Authority publication
- Planning for Watercourses in urban Environments, Guideline developed by Shannon regional Fisheries Board
- Nature-based Solutions to the Management of Rainwater and Surface Water Runoff in Urban Areas, Government of Ireland Publication
- All Ireland Pollinator Plan
- Advice notes issued from the Irish Landscape Institute

Planting Notes

New topsoil is required in all planting areas. 450mm depth for hedge planting areas, 150mm for grass lawn areas and 2m³ per tree pit. All shrub planting areas to receive 50mm of bark mulch.

Notes:

1. Timing and Phasing: All planting will take place after building works have commenced in a single phase at the first available time of planting. If planting is taking place outside of the dormant season, container grown plants are to be used of the same sized specified. The tenderer must allow for containerised planting should the works programme require planting outside of the dormant season.
2. Setting out and levels must be verified on site prior to construction.
3. Use of drawing for setting out assumes correct printing and scaling by user.
4. Samples of all materials are to be provided for approval by the Landscape Architect prior to installation.
5. Clarification on details to be sought, where required.

Pollinator Plan

-
- Pollinator
-
- Native Irish Plants

The Landscape planting design proposed comprises of both native and pollinator-friendly non-native planting with the view to improve connectivity within the surrounding environments and encourage rich bio- diversity contributing to the wider population of flora and fauna within the area and in line with the *All Ireland Pollinator Plan*.
