SOFT LANDSCAPING			
Trees			
Proposed Street Amenity spaces Planting. Selection of native tree species such as Betula pendula (Birch), Prunus padus (Bird Cherry) and Quercus robur (Oak) located according to ultimate size and tree characteristics			131no.
Selection of Native Irish species shrubs of varying shape and within a 3m height. All selections are contributory to biodiversity. Minimum 1.5m clear stem for street trees. Shrubs include: Enkianthus campanulatus, Viburnum opulus, Euonymus europaeus, Rosa canina, Amelanchier lamarckii, Salix sp. (Species have been tried and tested on other projects with similar site constraints and limitations) Small ornamental trees such as Acer palmatum and Amelanchier lamarckii are proposed at podium level where appropriate.			264no.

Composite timber or similar raised walkways			
Seating			
Timber stepping stones and pathways contributory to the 'Nature Journey' thus enhancing the Green Factor			
Nature play elements			
Short stay bicycle stands			
Sheffield stands			73 nos.
Bike shelter			30 nos.

Planning standards

- Landscape Design completed with reference to the following guidance and standards:
- Guidance of the Centre for Excellence in Universal Design with regard to universal access requirements.
 - Building Regulations, part M.
 - Urban Design Manual - A Best Practice Guide, Department of Environment Health and Local Government publication
 - Retail Design Manual, Department of Arts Heritage and the Gealtacht publication
 - Buildings for everyone-A Universal Design Approach, National Disability Authority publication
 - Planning for Watercourses in urban Environments, Guideline developed by Shannon regional Fisheries Board
 - Nature-based Solutions to the Management of Rainwater and Surface Water Runoff in Urban Areas, Government of Ireland Publication
 - All Ireland Pollinator Plan
 - Advise notes issued from the Irish Landscape Institute

Planting Notes

- New topsoil is required in all planting areas. 450mm depth for hedge planting areas, 150mm for grass lawn areas and 2m³ per tree pit. All shrub planting areas to receive 50mm of bark mulch.
- Notes:
1. Timing and Phasing: All planting will take place after building works have commenced in a single phase at the first available time of planting. If planting is taking place outside of the dormant season, container grown plants are to be used of the same sized specified. The tenderer must allow for containerised planting should the works programme require planting outside of the dormant season.
 2. Setting out and levels must be verified on site prior to construction.
 3. Use of drawing for setting out assumes correct printing and scaling by user.
 4. Samples of all materials are to be provided for approval by the Landscape Architect prior to installation.
 5. Clarification on details to be sought, where required.

Mood Board

Pollinator Plan

☿ Pollinator ☿ Native Irish Plants

The Landscape planning design proposed comprises of both native and pollinator-friendly non-native planting with the view to improve connectivity within the surrounding environments and encourage rich bio- diversity contributing to the wider population of flora and fauna within the area and in line with the All Ireland Pollinator Plan.
